## **2021 RESULTS**

The results share each participant's environmental performance in 2021 within each applicable performance indicator on the program's 1-to-5 scale.

#### **SCALE OF LEVELS**

#### COMPREHENSIVE VERIFICATION

With Green Marine's performance indicators and related criteria always undergoing annual review and revision when required, nothing and nobody can remain stagnant.

This equally applies to the external verifiers who make certain every two years that each participant has correctly reported performance levels for every applicable indicator and has the data and/or documentation to support that level. To ensure that the **third-party independent verifiers** themselves fully understand all of the program's changing requirements, Green Marine undertakes to conduct regular training with them as well as holding question and answer sessions when new topics or particular concerns arise. Green Marine has also implemented a quality assurance process to make certain that the verification is carried out with the same consistent rigour by all of the accredited verifiers.

Last year, the pandemic and its related travel restrictions forced Green Marine to develop new guidelines for its accredited verifiers to conduct their verifications remotely with the compulsory face-to-face discussion taking place through videoconferencing if an in-person or on-site visit by the verifier was deemed unsafe. The revised guidelines ensured that the verification process was done in the same thorough and rigorous manner.

With some pandemic restrictions still in place during the early months of 2022, Green Marine allowed for the remote verification process again. Nevertheless, a majority (53%) of verified participants were visited on site by the verifier.

#### **SMART REPORTING**

The Smart Guide, which is Green Marine's online reporting tool for participants, must also be regularly updated to provide accurate responses and subsequent data. Fully rolled out for verifiers in time for the reporting on 2021 performance, it has made it easier for verifiers and participants to share detailed information in confidence ahead of a site visit. This behind-the-scenes work has brought its share of technical challenges but is ultimately worth it to be able to offer this convenience to participants, and for Green Marine to have the ability to better assess and utilize the gathered information for overall data reporting.

### INTERPRETATION NOTES

The term n.a. (not applicable) appears several times in the report's tables because the issues addressed by the program do not necessarily apply to all participants. For example, a container terminal doesn't handle dry bulk commodities. An n.a. denotation could also refer to a situation in which a participant does not have full control over the operations on its premises. For example, a port cannot apply the Green Marine criteria where a terminal operator is in charge of facilities. Many port authorities oversee the leasing of port property and do not themselves operate terminals.

The published results indicate each participant's self-evaluated and subsequently verified performance for each of the Green Marine program's applicable indicators. While the program's self-evaluation is comprehensive, it is not an exhaustive assessment of all environmental matters related to a participant's maritime operations. Green Marine has not itself evaluated the environmental performance of the participating enterprises.

# GREENMARINE EUROPE HIGHLIGHTS

Green Marine Europe is taking hold since being launched by Green Marine and the Surfrider Foundation in April 2020. The program has **doubled its membership in one year** and now has 18 certified ship owners whose fleets include cargo ships, cruise lines, ferries, cablers and research vessels.

A key catalyst has been the political support given to Green Marine Europe at the International Union for the Conservation of Nature (IUCN) World Congress held in conjunction with the Government of France in September 2021.

While hosting the One Ocean Summit in February as part of his six-month European Union French President, Emmanuel Macron also expressed his strong wish for ship owners to integrate Green Marine Europe into their sustainability efforts and praised CMA CGM for joining the program.

Another remarkable advance is the recognition by the European Union of Green Marine Europe and Green Marine's waste management performance indicator as a means to verify whether vessels are eligible for discounts on harbour dues as per the European Commission's January directive that will require ports to offer reductions to ship owners in recognition of their efforts in minimizing waste.

Increased membership and a broader scope are also on the horizon for Green Marine Europe which is in the process of developing performance indicators for shipyards in response to a request by some of them to join the program.
